FROM	Chief, EE			ABSTRACT
				MICROFILM
SUBJECT	GRCROOND EEFIS Training Material			
ACTION REQUIRED - REFERENCES				
For Salzburg: See paragraph 4				
For SWPE : See Paragraph 6 b				
EASA 5716 -- 17 SEPTEMBER 1962				
<p>1. We enclose, as Attachment A, a copy of "The Fingerprint Identification System", the manual requested in the Reference for training GRCROOND assets in EEFIS. The fingerprint system is not in itself classified, but in view of the sensitivity of the operational use for which it was designed, the manual has been restricted to OFFICIAL USE ONLY and the following stipulations should be observed in using it:</p> <p style="margin-left: 40px;">a. It may be shown to trainees only under supervision of a staff officer;</p> <p style="margin-left: 40px;">b. It will be handled as a sensitive document.</p> <p>2. Attachment B to this dispatch contains ten each of the numerical and literal "crutches" for use in the EEFIS training. The text of the crutches appears in the back of the manual. There are two minor changes in the text which appear in the manual only, as follows: At the bottom of page 2 of the manual, the last sentence should correctly read "whorls will have at least two Deltas" etc.; and in the diagrams showing "Placing reference line on core and delta" on page 4, the reference line in diagram B should be placed as in the manual.</p>				
Attachments: H/W/A & B As stated

CONTINUATION OF DISPATCH	CLASSIFICATION S E C R E T	DISPATCH SYMBOL AND NUMBER EASW--1581
<p>3. Both literal and numerical crutches are being provided because the KUCLUB tells us that contrary to the procedure in most languages using roman script, German telecode favors the numerical system over the literal.</p> <p>4. These crutches are intended as agent guides in an operational situation and are not essential for training. They do, however, show the agent the kind of aid he will have for actual preparation of messages and it is advisable to be sure agents are "checked out" with the crutch. If the crutches have to be translated into German, KUROAR would be most grateful if you would forward a copy of the German text or texts to Headquarters for possible future requirements.</p> <p>5. These crutches are also forwarded with the security stipulation that they may be shown to trainees, but will at all times be under the control of staff personnel.</p> <p>6. Concerning other equipment that the Base will need for this training, KUROAR advises as follows:</p> <p>a. The viewers, as illustrated in Figures 85 and 86 of the manual, should be obtainable commercially in Austria; and it is suggested that they be purchased in the Field.</p> <p>b. A set of the Vu-Graph slides was sent to SWPE in October 1961 under cover of OFDS-507, for retention by [] and much time and expense will be saved if these can be borrowed by Salzburg. This dispatch will serve as a request to SWPE to lend to Salzburg Base a set of Vu-Graph slides for EEFIS training.</p> <p style="text-align: center;">[]</p>
